

Daniel Klie

Software Engineer

danielnswz@gmail.com | Argentina | linkedin.com/in/dkklie

1 Summary

Accomplished Full-Stack Software Engineer with over 8 years of experience designing, scaling, and maintaining robust web and mobile applications. Expert in modern JavaScript ecosystems, distributed systems architecture (GraphQL, RabbitMQ, Micro-frontends), and cloud infrastructure. Proven track record of leading technical teams and delivering high-impact solutions for the automotive fintech and digital retail industries.

2 Experience

Full Stack Developer | *AutoFi*

Remote | October 2021 – June 2026

- Architected and maintained high-traffic consumer applications and scalable APIs for a premier digital retail platform in the automotive industry.
- Leveraged Micro-frontends (Module Federation), GraphQL, and RabbitMQ to optimize system modularity, UI performance, and asynchronous communication.
- **Technologies:** React, Redux, NX, GraphQL, RabbitMQ, Node.js, Micro-frontends w/ Module Federation.

Full Stack Developer | *SweatWorks*

Remote | October 2020 – October 2021

- Developed and scaled a Corporate Challenge Race System utilizing a serverless architecture with AWS Lambdas and Node.js.
- Implemented critical cloud infrastructure including AWS Cognito for authentication, SQS for queuing, and a Redis-based rate limiter to handle high-throughput traffic spikes safely.
- **Technologies:** React, Redux, Redux-Thunk, Node.js, AWS Lambdas, Serverless, Sequelize ORM, AWS Cognito, SQS, S3, SES, Redis.

Senior Software Engineer | *Cognizant Softvision*

Argentina | October 2019 – October 2020

- Led an engineering team in developing a robust React Native sales application, driving technical alignment and optimization strategies.
- Architected custom native bridges to establish seamless device communication between the mobile app and specialized hardware SDKs (POS terminals, printers, and mounting stands).
- **Technologies:** React Native, Redux, Redux-Saga, Re-select, Native SDK Bridges, Dependency Injection.

Front-end Developer | *Fortesza*

Remote | February 2018 – September 2019

- Developed a multi-user crowdfunding platform tailored for corporate financing, building complex administration panels for both investors and companies.
- Spearheaded the migration of the core web application to Angular 6+, leveraging reactive forms, Flex-Layout, and advanced charts libraries to maximize data visualization and frontend performance.
- **Technologies:** Angular 6+, Flex-Layout, Reactive Forms, Metrics & Charts Libraries.

Early Full-Stack & Contract Experience

Remote | 2015 – 2018

- **Zonngo (Back-end Developer):** Designed and delivered a secure Node.js backend, REST APIs, and OAuth server components for a retail price monitoring platform.
- **Seguros Caroní & Agentes Informáticos (Full Stack / Intern):** Engineered health insurance management databases and dynamic inventory web software applications utilizing PHP Laravel and AngularJS.
- **Core Technologies:** Node.js, PHP Laravel, AngularJS, REST APIs, OAuth (Client & Server).

3 Education

Universidad Nacional Experimental de Guayana
Ingeniería Informática

2012 – 2018

4 Languages

Español (Native), Inglés (Full Professional Proficiency)
