

Daniel Klie

Software Engineer | Argentina

LinkedIn | Github | danielnswz@gmail.com

Summary

I am a Full-Stack Software Engineer with over 8 years of experience designing, scaling, and maintaining robust web architectures, scalable backends, and intelligent distributed systems. Expert in modern JavaScript ecosystems, cloud infrastructure, and augmenting software development through AI-assisted workflows with agentic coding tools. Proven track record of leading technical engineering initiatives and delivering high-impact software solutions for the fintech and digital retail industries.

Experience

Full Stack Developer | *AutoFi* Remote | October 2021 – Current

- Architected and maintained high-traffic consumer applications and scalable APIs for a premier digital retail platform in the automotive industry.
- Leveraged Micro-frontends (Module Federation), GraphQL, Go services and RabbitMQ to optimize system modularity, UI performance, and asynchronous communication.
- Applied methodologies with agentic coding tools (AI) to define technical requirements, accelerate system prototyping, and refactor backend services.
- Contributed to different agentic coding workflows, including CI/CD pipelines, automated code reviews, and code generation for repetitive tasks, significantly improving development efficiency and code quality.
- Acted as Subject Matter Expert (SME) across core microservices, providing technical guidance, clear documentation, and cross-team knowledge sharing.
- **Technologies:** Preact, React, Javascript, Typescript, Apollo, Tanstack Query, Redux, NX, GraphQL, Docker, MongoDB, Mongoose ODM, Nginx, NX, Microservices, RabbitMQ, Golang, Node.js, Microfrontends (Module Federation).

Full Stack Developer | *SweatWorks* Remote | October 2020 – October 2021

- Developed and scaled a Corporate Challenge Race System utilizing a serverless architecture with AWS Lambdas and Node.js.
- Implemented critical cloud infrastructure including AWS Cognito for authentication, SQS for queuing, and a Redis-based rate limiter to handle high-throughput traffic spikes safely.
- **Technologies:** React, Redux, Redux-Thunk, Node.js, AWS Lambdas, Serverless, Sequelize ORM, AWS Cognito, SQS, S3, SES, Redis.

Senior Software Engineer | *Cognizant Softvision* Argentina | October 2019 – October 2020

- Led a software team in delivering a high-reliability sales application, driving technical alignment and team accountability.
- Engineered cross-platform mobile and backend services, architecting custom native bridges to establish seamless communication between system endpoints and specialized hardware SDKs (POS terminals, printers, mounting stands).
- **Technologies:** React Native, Node.js, Redux, Redux-Saga, Native SDK Bridges, Dependency Injection, REST APIs.

Front-end Developer | *Fortesza* Remote | February 2018 – September 2019

- Developed a multi-user crowdfunding platform tailored for corporate financing, building complex administration panels for both investors and companies.
- Spearheaded the migration of the core web application to Angular 6+, leveraging reactive forms, Flex-Layout, and advanced charts libraries to maximize data visualization and frontend performance.
- **Technologies:** Angular 6+, Flex-Layout, Reactive Forms, Metrics & Charts Libraries.

Early Full-Stack & Contract Experience Remote | 2015 – 2018

- **Zonngo (Back-end Developer):** Designed and delivered a secure Node.js backend, REST APIs, and OAuth server components for a retail price monitoring platform.
- **Seguros Caroní & Agentes Informáticos (Full Stack / Intern):** Engineered health insurance management databases and dynamic inventory web software applications utilizing PHP Laravel and AngularJS.
- **Core Technologies:** Node.js, PHP Laravel, AngularJS, REST APIs, OAuth (Client & Server).

Education

Universidad Nacional Experimental de Guayana 2012 – 2018
Ingeniería Informática

Languages

Español (Native), Inglés (Full Professional Proficiency)
